Did You Know?

Bio-Chem Consulting Services (1980) Ltd. is an **Analytical Laboratory** that has been providing dependable and reliable Mycology (Mould and Yeast) Testing Services in Southern Alberta for over 10 years. During this time we have responded to the shifting demands of the industry and we currently offer a full range of testing services for the **Indoor Air Quality** Sector (among others).

Bio-Chem also offers testing and consulting services in a variety of different areas including: Microbiology, Chemistry, Corrosion and Pharmaceuticals.

What does Bio-Chem offer?

At Bio-Chem we can provide you with the information you need to make an informed decision on the health and safety of your family, colleagues or clients whether you are a homeowner, concerned employee or a Professional Consultant. Our services are tailored to each individual client, and regardless of your background, our test reports are easily understood and technically comprehensive.

We offer comprehensive testing packages including the enumeration and identification of potentially problematic organisms, Spore Trap cassette (total spore/allergen) evaluations, viable spore (RCS) testing, and Direct (Microscopic) examinations to name just a few!

We are **Accredited** to ISO 17025 (International Standard for Labs) for specific services so you can be assured that our data is of high quality.
