Did You Know?

Bio-Chem Consulting Services (1980) Ltd. is an **Analytical Consulting Laboratory** that has been providing dependable and reliable Industrial Sector Services in Southern Alberta for over 20 years. During this time we have responded to the shifting demands of this Sector and we currently offer a full range of testing services for our Industrial Clientele.

Bio-Chem also offers testing and consulting services in a variety of different areas including: Chemistry, Microbiology, Toxicology, Mycology (Mould Analysis), Pharmaceutical, and Corrosion Analysis.

What does Bio-Chem offer?

We offer comprehensive testing packages, analyzed at a single location, which includes Chemical, Microbiological, and Corrosion Testing Parameters. At Bio-Chem we pride ourselves on our personalized service and our competitive pricing make us a clear choice for all of your Industrial Testing needs.

We are **Accredited** to ISO 17025 (International Standard for Labs) for specific services so you can be assured that our data is of high quality.

Also all of our Analyses are tailored to meet the requirements of the most current Regulatory Requirements of the Industry. Our standard services are tailored to test Industrial Waste Waters, Cooling Tower Fluids, Corrosion Coupons, or Corrosion Deposits, however, we can always build custom packages for non-routine cases or to assess individual problems.
